#### **IT training**

At 8-12 weeks you can already have work in IT

You don't need to know anything about IT

You will get a website that you learn to maintain yourself and there you will put pictures of your practical assignments on it.

And with that you will present yourself to work or a higher education.

The lessons are given in Dutch and English.

The foundation has a training agreement with the UWV that pays unemployment benefits

The UWV pays 2,496 euros per person for the education/training.

Because of the coronavirus no unemployed persons have started the training through the UWV this year.

On the other hand, the foundation did receive 10,000 euros in corona subsidy in 2020 to compensate for the loss of that income.

That is a budget for 4 people and for that purpose 4 unemployed women are now being trained.

Also for 2021 the expectation is that a number of women can be trained at no cost to them.

Ask via email if there is still room.

**Mail:** [info@komp-u-ter-hulp.nl](mailto:info@komp-u-ter-hulp.nl)

You can also apply for an Experience Certificate Acquired Competencies (EVC), which is equivalent to a diploma.

For students of Komp u to hulp, this is generally MBO-3. (grade 10)

And then you can move on to MBO-4 (grade 11-12) or start looking for work .

An EVC is issued by separate agencies.

With MBO-4 you are eligible for college (HBO, Hogeschool)

With our training you can also go to MBO-4 (Zadkine Rotterdam) without the EVC.

But the problem is that secondary vocational education is only provided in Dutch.

But you can also do the 21+ admission test for college (HBO) from the age of 20 for an

English IT study.

The test is especially for people who do not meet at the pre-education requirements.

The test costs 150 euro's and then you can try it already in January and you will get a second chance in June.

Then you can find paid work at MBO-3 level and you are often eligible for a partial College (Hogeschool HBO) course paid by the company and then you have no study debt.

**The problem remains that the MBO only teaches in Dutch**  
**At Komp u ter hulp you will be [taught in Dutch and English](#).**

For English students it is then advisable to apply for that EVC.

And then do the 21+ admission test for college (HBO)

With that EVC MBO-3 level you can find work. And if you can prove that you are eligible for College is that a big plus.

If you are 27 years of age or older, you will need paid work, because you will no longer receive full study financing from the age of 30. Then you can only borrow the tuition fees.

And with part-time HBO, which is paid for by the company, you don't have a study debt anyway.
